

ANURAG KHILARE [Backend Developer | Python]

+917620889330 | Mohol, Maharashtra | anuragkhilare01@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Backend Developer with hands-on experience building scalable web applications and AI-powered systems using Python, FastAPI, Flask, PostgreSQL, Docker, Redis, and Celery. Skilled in designing REST APIs, asynchronous task processing, database management, and containerized deployments. Strong foundation in Data Structures & Algorithms and software engineering principles. Passionate about building high-performance backend systems and distributed applications.

EDUCATION

B.Tech. in Computer Science and Engineering 2025, SMSMPITR, Akhuj	- 83.10%
H.S.C. 2021, Netaji Junior Science College, Mohol	- 90.67%
S.S.C. 2019, Jagadamba Vidyalaya, Pokharapur	- 89.00%

TECHNICAL SKILLS

Programming Languages: Python, SQL, Git/GitHub

Backend Development: Django, FastAPI, RESTful APIs, JWT Authentication, API Integration

Databases: MySQL, MongoDB, PostgreSQL

DevOps & Deployment: Docker, Docker Compose, Nginx, Linux, Git/GitHub

Message Queues & Caching: Celery, Redis

Frontend Development: ReactJS, JavaScript, HTML, CSS

Machine Learning & AI: Scikit Learn, XGBoost, ML Algorithms, Tensorflow, Neural Networks, LangChain, AI Agents, Vectorstores, HuggingFace

CS Fundamentals: Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems, Computer Networks

Additional: Prompt Engineering, ChatGPT, Google-Gemini, n8n, Zapier, Tableau, Power BI

EXPERIENCE

Data Science Intern: Ai Variant, Pune

(Feb 2025 – Aug 2025)

- Worked on real-world datasets, performing **data cleaning, preprocessing**, and **exploratory data analysis** to uncover meaningful patterns.
- Built and evaluated **machine learning models**, **improving prediction accuracy** and gaining hands-on experience with core ML techniques.
- Created clear documentation and presented insights, contributing to a smoother end-to-end data science workflow and better **decision-making**.

PERSONAL PROJECTS

E-Commerce Platform

- Designed and developed scalable REST APIs using FastAPI for authentication, product management, cart operations, and order processing
- Implemented asynchronous background task processing using Celery and Redis to improve system performance and scalability
- Integrated PostgreSQL for efficient data storage, retrieval, and transaction management
- Developed responsive frontend interfaces using React and Vite for seamless user interactions
- Containerized backend services using Docker and Docker Compose for consistent deployment across environments
- Configured Nginx as a reverse proxy and followed modular architecture with API-first development practices

AI Document Intelligence API

- Designed and developed scalable REST APIs using FastAPI following SDLC practices
- Built LLM-powered document Q&A and summarization system using LangChain
- Implemented RAG pipeline with FAISS and embeddings for context-aware responses Developed UI/frontend layer to interact with backend services

RAG-Based Document Question Answering System

- Developed end-to-end pipeline including document ingestion, chunking, embeddings, and retrieval
- Ensured high accuracy and reduced hallucinations through optimized retrieval techniques
- Built interactive UI using Streamlit with chat history tracking

Autonomous AI Marketing Agent

- Built AI agent to monitor emails, classify intent using LLM (Ollama), and generate automated responses
- Implemented IMAP/SMTP-based automation pipeline for real-time email processing
- Designed modular architecture for efficient and scalable workflows

ACHIEVEMENTS

- Solved 150+ DSA problems on coding platforms.
- Built multiple end-to-end backend and AI-powered projects.
- Hands-on experience with Docker-based application deployment.

CERTIFICATIONS

- Data Science Certification, ExcelR Solutions (June 2025)

Certificate No: 19902/EXCELR/18062025

Yours faithfully
Mr. Anurag Satish Khilare
